OPTIS
CardLock

Dependable
Compact stainless steel design, durable weather-resistant materials, and built in heater to withstand Canadian winters.

Fleet Accounts
Improved security and ease of use for pre and postpaid fleet accounts. On-screen entry or card insert with optional passcode.

Easy to Use
Intuitive user interface for easy navigation through the transaction and pump arming process.

Card Insert
Card insert is enabled for all major credit cards and fuel cards to increase transaction options.

EMV & PCI
Credit and digital wallet payments are accepted through chip & PIN or tap payment terminals (EMV L1, L2 and PCI PTS 3.X/4.X).

Receipt Printer
Built-in low maintenance receipt printer with extra large roll capacity and anti-jam design.

10" Touchscreen
Bright LED screen and responsive touch inputs. OPTIS CardLock can control up to 8 pumps at once.

Data Entry
Cardlock transactions use on-screen question prompts and customer data entry for improved compliance & fleet management

Improved Commercial Accounts

Scale operations with **unlimited commercial accounts**. On-screen question prompts verify user safety requirements and **automatic transaction posting to iPOS** improves invoicing and account management. Main and sub accounts can be used to track usage by employee or company and provide more detailed reports to account holders.

Credit Card Enabled

Improve user experiences with more payment options. OPTIS CardLock is **enabled to take all major credit cards and digital wallet payments** through tap or card insert. All payment terminals are EMV certified, PCI compliant, and **backed by Moneris** to provide secure and reliable transactions.
